MAIDAM AJAY KUMAR

ajaymaidam19@gmail.com +91-8008742025 Hyderabad Linkedin GitHub

Summary

Data Science Professional with a strong foundation in Python, SQL, statistics, machine learning, and data visualization. Skilled in analyzing complex datasets, developing predictive models, identifying meaningful insights, and translating data into actionable business solutions. Experienced with tools such as Pandas, NumPy, Scikit-learn, Power BI, and Tableau, with a strong interest in solving real-world problems through data-driven approaches.

Skills

Programming:
Python, SQL

Machine Learning:
Scikit-learn, Regression, Classification, Clustering, Feature Engineering, Model Evaluation

Statistics:
Descriptive Statistics, Probability, Hypothesis Testing, Correlation & Regression

Tools & Platforms:
Jupyter Notebook, Google Colab, Git, GitHub

Data Analysis:
- Pandas, NumPy, Excel, Exploratory Data Analysis (EDA)

Data Visualization:
Power BI, Tableau, Matplotlib, Seaborn

Databases:
MySQL,OracleSQL

Projects

Unsupervised Deep Anomaly Detection for Machine Condition Monitoring Using Acoustic Signals
- Developed an unsupervised deep learning-based anomaly detection system to identify abnormal machine conditions from acoustic signals.
- Performed data preprocessing, noise reduction, feature extraction, and exploratory analysis on acoustic signal data.
- Trained and evaluated a deep learning model to distinguish normal operating patterns from potential machine faults.
- Analyzed anomaly patterns to support early fault detection and predictive maintenance of industrial machinery.
- **Technologies:** Python, Librosa, TensorFlow/Keras, Scikit-learn, NumPy, Pandas

Customer Behavior Analysis & Dashboard | SQL, Python, Power BI
- Performed an end-to-end data analytics project, including data cleaning, EDA, SQL analysis, and business insight generation.
- Used SQL and Python to analyze customer demographics, purchasing behavior, product categories, revenue, and subscription trends.
- Developed an interactive Power BI dashboard with KPIs, slicers, charts, and filters for dynamic customer and sales analysis.
- Generated actionable insights by analyzing sales and revenue across customer segments, age groups, categories, and shipping preferences.
- **Technologies:** SQL, Python, Pandas, NumPy, Power BI, Excel, Matplotlib, Seaborn

Education

Bachelor of Technology in Computer Science (Data Science), 09/2023 – 05/2026
Vaagdevi Engineering College Warangal

Certificates

- Deloitte Data Analytics Job Simulation - FORAGE
